Information Technology

Regardless of size, companies face complex choices in information technology that can affect productivity and hinder growth.

Sources of the complexity include:

- Current systems that cannot handle increasing volume without significant manual effort
- Balancing long term efficiencies that an IT solution can bring versus current capital cost for those solutions
- Creating a combined vision of the IT initiative in environments that may have many competing priorities

Bridgepoint Consulting brings expertise, experience and a proven methodology to navigate these challenges.

We start with the business in mind. IT consultants often find a new, interesting technology and make it fit the business. Bridgepoint Consulting defines the business issues first and then designs a technology solution to solve the business problem. Our first priority with every project is to develop a clear vision of success, grounded in the business objectives of the effort. This vision is based upon the consensus decision of the senior management team which we often facilitate developing.

We act like an owner. Perhaps it's our start-up roots, but the principals at Bridgepoint Consulting are especially sensitive to IT industry statistics that show how infrequently projects are delivered as planned. Our commitment to you is that your experience will be different with us. We have a long history of delivering projects on-time and on-budget, a track record that we will continue.

Full service, with greater flexibility. The foundation of our IT services is a full portfolio of services, rivaling management consulting firms 10 to 100 times our size, but with a greater degree of flexibility that a regionally-focused, tightly-managed team can offer. This means that we consider each client's needs with an eye on delivering results, uniquely tailored to their culture, circumstances, and budget.

If you are not getting the value you expect from the IT dollars you spend, please let us know how Bridgepoint Consulting can help you!

Extend your reach with Bridgepoint Consulting. More services, flexibility, quality – that's Bridgepoint's commitment. But, don't just take our word for it. We've also been ranked one of the top management consulting firms by the *Austin Business Journal*. More importantly, our clients and partners are the strongest proof – contact us today and we'll put you in touch!
